Press release

2022, February 4

EUROREPAR: a completely refreshed wheel bearing range.

Wheel bearings are high tech parts which need to be able to withstand friction, shock and temperature changes. The new Eurorepar wheel bearings range was designed with the needs of maintenance and repair professionals in mind, and has been completely refreshed based on even more stringent quality requirements.

With 365 products included, the new Eurorepar wheel bearings range has been streamlined to meet the needs of the vast majority of customers. It includes the most common wheel bearing types on the market, which cover almost 85% of the fleet in circulation, namely generations 1 and 2 as well as generation 3 (with integrated sensor and hub).

Packaged in kits, the Eurorepar wheel bearings range includes all the accessories that are needed for repairs: seals, nuts, set rings, circlips… A specific tutorial for wheel bearings (https://www.youtube.com/watch?v=XzdLWYmAQCY), as well as detailed and illustrated assembly instructions included in each package to help support repair professionals when replacing the part.

Eurorepar wheel bearings are waterproof and oiled with high performance grease specifically designed for the purpose, and which can withstand temperatures between -40° to +150°. They undergo several tests to ensure they fulfil the levels of performance and quality required by Stellantis technicians and engineers.

Wheel bearings are safety components, they may become increasingly loose during use and result in a wheel locking up or in the loss of the wheel, which would likely cause an accident. As a result, they must be inspected as part of services into the front and rear suspension of the vehicle, in particular if the driver reports noises or vibrations.

As is the case with all of Eurorepar's multibrand part ranges, the Eurorepar wheel bearings range has a 2 year guarantee.

About Eurorepar

Present in over 100 countries, Eurorepar is the multi-brand range of automobile products (spare parts, accessories, tyres, oils, consumables, etc.) from Stellantis intended for servicing and repairing vehicles. With more than 15,000 product references, Eurorepar provides one of the most extensive ranges on the market, combining quality, affordability and performance. It is perfectly suited to the needs of all repair agents.
