EUROREPAR

Press release

EUROREPAR is extending its start-stop battery range for cars and LCVs

Batteries are increasingly relied upon across most vehicles currently in use and are equipped with several electronic components. They need to provide ever more power with total reliability under all weather conditions. To meet the demands of the market, Eurorepar is supplementing its battery range with new products which are adapted to the start-stop systems found in cars and LCVs.

The Eurorepar battery range includes 32 products and meets the requirements of 95% of the current fleet in circulation in Europe and Asia for the 3 technologies used:

- 22 standard products for conventional vehicles,
- 10 EFB and AGM products for ICE vehicles, hybrids and electric vehicles, including 3 new products covering LCV applications such as the Citroën Jumper, Fiat Ducato, IVECO Daily 35S14, Mercedes Vito, Vauxhall Movano, Peugeot Boxer, Renault Master/Latitude, VW Transporter, etc.

Eurorepar EFB and AGM batteries are more powerful, optimising energy flow to achieve high resistance to the repeated charge/discharge cycles that are endured by start-stop technologies. They also offer excellent cold cranking performance and a lifespan that is on average four times as long as conventional batteries.

To help repair professionals to rapidly deal with this type of breakdown, which requires availability and responsiveness when identifying the issue and when providing parts, the entire range of Eurorepar batteries is available across 140 Distrigo distribution hubs for delivery within 4 hours or less. Repair professionals can use Service Box Multi-Brand to identify the product reference they need, check whether it is available and when it can be delivered, as well as draft a quote, make an order and access the vehicle's technical data in order to change the battery in current vehicles.

About Eurorepar

Present in over 100 countries, Eurorepar is the multi-brand range of automobile products (spare parts, accessories, tyres, oils, consumables, etc.) from the Stellantis Group intended for servicing and repairing vehicles. With more than 15,000 product references, Eurorepar provides one of the most extensive ranges on the market, combining quality, affordability and performance. It is perfectly suited to the needs of all repair agents.
