ISO 9001 2015

PRODUCT ADVANTAGES

- Complete renewal of the range: improved price positioning and better vehicle coverage
- Premium quality of parts replaced
- No deposit
- Ready to install

Developed **in partnership with a specialist in renovation**, the new Eurorepar range of alternators and starter motors covers **70% of the cars on the road in France and Europe** (twice as many as the previous range).

In addition to covering applications **on vehicles of other brands**, the new range now covers **PSA vehicles** for petrol and diesel engines.

Alternators and starter motors are **essential components** when starting a vehicle and ensuring it operates correctly, which is why Eurorepar pays particular attention **to the quality of its parts.**

DID YOU KNOW?

The intensity of the headlights varies? The dashboard battery indicator lights come on?
Remember to check your alternator!

RENOVATION

- **All wear parts are replaced** by original or premium-quality components satisfying the original specifications;
- **All re-usable components are subject to specific cleaning and treatment** to ensure correct mechanical and electrical performance;
- All rotating machinery is **tested and validated before being shipped.**

TECHNICAL CHARACTERISTICS

- **Starter motor**: **high power and reliability when starting**, even in extreme conditions; **excellent air-tightness** preventing dust and liquids from entering; bearings with friction reduced to a minimum enabling a **consequent reduction in wear**.
- **Alternator**:
  - **Two alternator technologies**, adapted to the real market requirements: controlled and not controlled.
  - **Assembly similar to the original part** thanks to specifications entirely identical to the original equipment; resistant to fluids and dust; full compatibility with sophisticated electronics systems.

WWW.EUROREPAR.COM

Our parts are guaranteed for two years* against any defect in manufacture or material**.
(*) For the Abarth, Alfa Romeo, Chrysler, Citroën, Dodge, DS, Eurorepar Car Service, Fiat, Fiat Pro, Jeep, Lancia, Opel, Peugeot, Ram and Vauxhall repair networks: the warranty is for parts AND labour for two years.
(**) For the applicable conditions, ask your distributor.

CONDITIONS FOR REPLACEMENT

There are several signs indicating that replacement is necessary:

- **Starter motor**: if difficulties are encountered in turning the engine over on or if it is impossible to start the vehicle whereas the indicator lights come on (showing that the battery is not at fault);
- **Alternator**: battery indicator light comes on or low intensity of headlight beams.

REGULATIONS

Iso 9001 2015

All our rotating machinery is tested individually. More than 30 checks are conducted on finished parts.

- Speed, power and temperature tests are conducted to ensure the reliability of our parts.

Once assembled, **all our finished parts are tested again** in the same conditions, before being labelled and packaged.

Resistance to corrosion:

- All parts are disassembled, and all components are washed and dried. A final coat of paint is applied to prevent corrosion.

REMEMBER!

The alternator belt transmits the engine power to the alternator. It is therefore essential to replace the accessory belt(s) when replacing the alternator. The belt tension must also be checked.

A RENOVATED RANGE AS SIMPLE AS A NEW RANGE!

For greater simplicity, we offer you a range with no deposit and without the need to return old materials.
