EUROREPAR

STEERING BALL JOINTS AND TIE RODS

SUSPENSION / STEERING

Last Update: 2024/02

PRODUCT ADVANTAGES

- Safety and comfort when driving
- Threaded steering ball joints to allow for precise adjustment
- Corrosion protection

With over 300 steering ball joint and tie rod products, and over 160 anti-roll bar tie rod products, covering the majority of the European fleet in circulation, the Eurorepar suspension and steering parts range has been developed to meet the market's needs.

The steering parts are located in the steering rack extension and ensure connection with the wheels and send information from the steering wheel to the wheels.
For their part, anti roll bar tie rods are suspension parts which reduce vehicle body roll when turning and contribute to improved handling.

THE RANGE

- **The Eurorepar range includes the following:**
- **Steering tie rods**
- **Steering ball joints**
- **Anti-roll bar tie rods**

CONDITIONS FOR REPLACEMENT

- The suspension should be checked during each service or after a strong impact (this will result in a follow-up visit after the Technical Inspection).
- As wear and tear in this component is gradual, it is difficult for motorists to notice it. Wheel alignment is essential whenever a steering ball joint or tie rod is changed, but in unnecessary in the case of anti-roll bar tie rods. However, there are several warning signs of wishbone joint wear and tear:
- A clicking noise when the vehicle drives over obstacles or when you turn the steering wheel.
- Unusual vibrations
- Deteriorated grip.

ADDITIONAL SALES

When replacing the tie rod or the anti-roll bar, it is recommended to check the suspension wishbone or arms, as well as the silentbloc. If they are worn or cracked, they need to be changed.

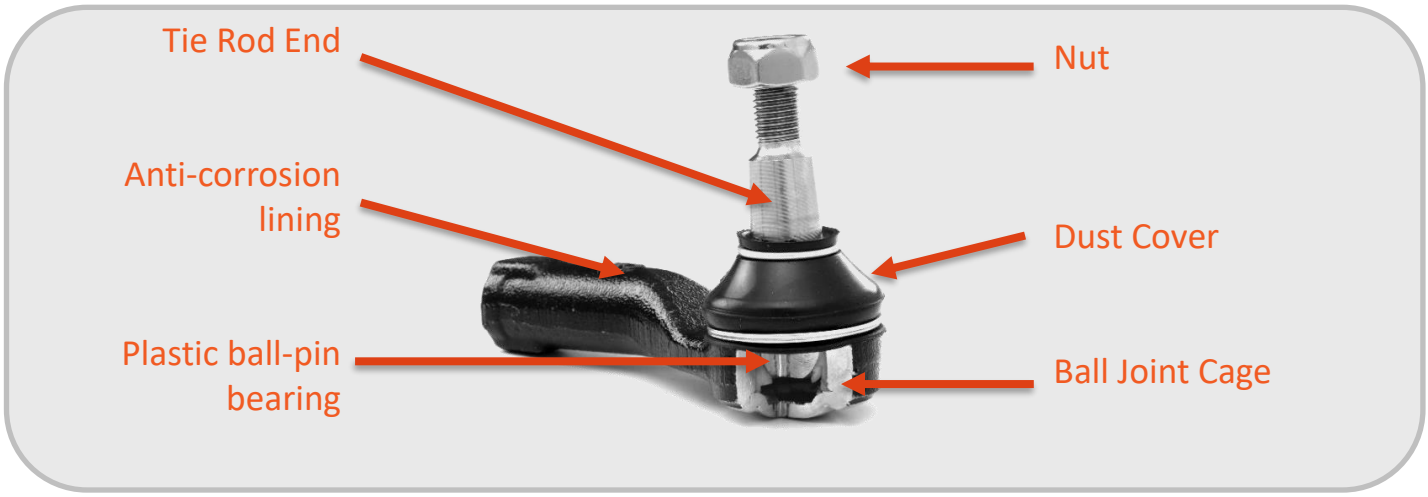

Our parts are guaranteed 2 years* against any manufacturing or material defect**.

(*) For Peugeot, Citroën, FCA, DS, Opel, Vauxhall, Eurorepar Car Service repair networks: the warranty runs for 2 years, parts AND labour included.
(**) For the conditions of application, contact your dealer.

(*) Avoids any risk to fake parts and guarantees their quality.
